EXPERIENCE

Geistwear | Chief Executive Officer

Jun 2018 - Present | Los Angeles, CA | www.gamegeist-apparel.com

- Managed and devised a starting budget of \$8000 to negotiate overseas manufacturing, coordinate design efforts, and develop a brand ambassador program
- Bolstered sales revenue by 200% through the organization of two pop-up shops in one semester
- Spearheaded business branding and online development efforts and increased website traffic and leads by 1000%

World Economic Forum | Software Engineering Intern

Jul 2018 - Aug 2018 | Geneva, CH | www.weforum.org

- Designed and deployed a full-stack application for the communication team's internal server which standardizes the media reporting process and dynamically configures all records into an interactive data analytics web platform
- Prototyped a front-end interface using Python, Django, HTML5, and ECharts
- Developed a comprehensive database with PostgreSQL from data scraped via a master Excel spreadsheet

SB Digital Agency | Web Developer Intern

Apr 2018 - Present | Los Angeles, CA | sdigitalagency.com

- Spearheaded the creation of a new landing page which procured 200+ lead generations in the first month
- Developed a website to showcase luxurious Italian villa rental listings which served 8 clients
- Maintained the WordPress-based website using HTML, CSS, JavaScript, and PHP

HackSC Junior | Director of Marketing

Sept 2017 - Present | Los Angeles, CA | hackscjr.org

- Doubled hackathon attendance by recruiting 300+ middle and high school students in which 85% identified with an underrepresented background for the 2018 event
- Revamped the HackSC Junior website using HTML5 and JavaScript to create a more responsive design
- Expanded social media presence to three additional platforms

PROJECTS

Emaily | MongoDB, Express, React.js, Node.js, Heroku

Full-Stack Web Application | <https://orm-emaily.herokuapp.com/>

- Built a MERN-stack service for users to send mass emails to a large list of users for the purpose of collecting feedback
- Implemented an authentication system using Passport.js and Google OAuth 2.0
- Utilized the Stripe API for handling billing and payment processing and the SendGrid API for automated emails

Bilk | Python, Django, PostgreSQL, Bootstrap, Heroku

Full-Stack Web Application | <https://bilk.herokuapp.com/>

- Developed a URL shortening service for converting long links to short snippets for better sharing across the web

The Social Network | C++

Backend Project

- Developed a social network model application
- Implemented a Breadth-First Search algorithm for computing shortest paths, friend suggestions, and disjointed user sets
