## EXPERIENCE

### GameGeist Apparel LLC | Co-Founder

Jul 2018 - Present | Los Angeles, CA | [www.gamegeist-apparel.com](http://www.gamegeist-apparel.com)

- Developed and executed a B2C sales model through an e-commerce platform
- Managed and devised a starting budget of \$6000 to negotiate overseas manufacturing, coordinate design efforts, and develop a brand ambassador program
- Spearheaded business branding and online development efforts and increased online traffic and leads by 1000%

### World Economic Forum | Software Engineering Intern

Jul 2018 - Aug 2018 | Geneva, CH | [www.weforum.org](http://www.weforum.org)

- Designed and deployed a full-stack application for the communication team's internal server which standardizes the media reporting process and dynamically configures all records into an interactive data analytics web platform
- Prototyped a front-end interface using Python, Django, HTML5, and ECharts
- Developed a comprehensive database with PostgreSQL from data scraped via a master Excel spreadsheet

### SB Digital Agency | Web Developer Intern

Apr 2018 - Present | Los Angeles, CA | [sdigitalagency.com](http://sdigitalagency.com)

- Spearheaded the creation of a new landing page which procured 200+ lead generations in the first month
- Maintained the WordPress-based website using HTML/CSS, JavaScript, and PHP
- Performed regular debugging to optimize web performance

### HackSC Junior | Director of Marketing and Organizer

Sept 2017 - Present | Los Angeles, CA | [hackscjr.org](http://hackscjr.org)

- Doubled previous year's attendance by recruiting 300+ middle schoolers and high schoolers of whom 85% identified as a minority for the 2018 pre-college hackathon
- Revamped the HackSC Junior website using HTML5 and JavaScript to create a more responsive design
- Expanded social media presence to three additional platforms including Instagram, Twitter, and Medium

## PROJECTS

### Emaily | MongoDB, Express, React.js, Node.js, Heroku

Full-Stack Web Application | <https://orm-emaily.herokuapp.com/>

- Built a MERN-stack service for users to send mass emails to a large list of users for the purpose of collecting feedback
- Implemented an authentication system using Passport.js and Google OAuth 2.0
- Utilized the Stripe API for handling billing and payment processing and the SendGrid API for automated emails

### Bilk | Python, Django, PostgreSQL, Bootstrap, Heroku

Full-Stack Web Application | <https://bilk.herokuapp.com/>

- Developed a URL shortening service for converting long links to short snippets for better sharing across the web

### The Social Network | C++

Backend Project

- Developed a social network model application
- Implemented a Breadth-First Search algorithm for computing shortest paths, friend suggestions, and disjointed user sets
