ORGANIZATIONS

GameGeist Apparel LLC | Co-Founder

Jun 2018 - Present

Established trendy college gameday apparel for men and women. Managed web development, e-commerce, product and marketing outreach, and business operations.

Jopwell | Campus Ambassador

Jun 2018 - Present

Empowered and connected Black, Latinx and Native American students with job opportunities. Engaged in campus outreach events including social media campaigns.

AthenaHacks | Volunteer Committee

Aug 2017 - Present

Managed videography and assisted with photography for the 2018 all-female hackathon event.

Scope USC | Student Developer

Jan 2017 - Present

Selective software engineering club with a less than 10% acceptance rate. Built several web and mobile applications. Learned React.js in spring 2017, React Native in fall 2017, and DevOps, Node.js, and Express in spring 2019.

EXPERIENCE

World Economic Forum | Software Engineering Intern

Jul 2018 - Aug 2018 | Geneva, CH | www.weforum.org

- Designed and deployed a full-stack application for the communication team's internal server which standardizes the media reporting process and dynamically configures all records into an interactive data analytics web platform
- Prototyped a front-end interface using Python, Django, HTML5, and ECharts
- Developed a comprehensive database with PostgreSQL from data scraped via a master Excel spreadsheet

SB Digital Agency | Web Developer Intern

Apr 2018 - Present | Los Angeles, CA | sdigitalagency.com

- Spearheaded the creation of a new landing page which procured 200+ lead generations in the first month
- Bolstered a sales funnel to capture those in the fine dining market utilizing an automated workflow via MailChimp
- Maintained the WordPress-based website using HTML/CSS, JavaScript, and PHP
- Performed regular debugging to optimize web performance

HackSC Junior | Director of Marketing and Organizer

Sept 2017 - Present | Los Angeles, CA | hackscjr.org

- Doubled previous year's attendance by recruiting 300+ middle schoolers and high schoolers of whom 85% identified as a minority for the 2018 pre-college hackathon
- Revamped the HackSC Junior website using HTML5 and JavaScript to create a more responsive design
- Expanded social media presence to three additional platforms including Instagram, Twitter, and Medium

PROJECTS

Emaily | MongoDB, Express, React.js, Node.js, Heroku

Full-Stack Web Application | <https://orm-emaily.herokuapp.com/>

- Built a MERN-stack service for users to send mass emails to a large list of users for the purpose of collecting feedback
- Implemented an authentication system using Passport.js and Google OAuth 2.0
- Utilized the Stripe API for handling billing and payment processing and the SendGrid API for automated emails

Bilk | Python, Django, PostgreSQL, Bootstrap, Heroku

Full-Stack Web Application | <https://bilk.herokuapp.com/>

- Developed a URL shortening service for converting long links to short snippets for better sharing across the web
- Configured unique shortcodes and dynamic link routing

Web Search Engine | C++

Backend Project

- Built the back-end of a web search engine from scratch
- Implemented a web crawler which retrieves all pages from the web and parses through user queries

The Social Network | C++

Backend Project

- Developed a social network model application allowing users to be added, friend connections made, etc.
- Implemented a Breadth-First Search algorithm for computing shortest paths, friend suggestions, and disjointed user sets
